# MY RECENT PROJECT

2023-2024

1. *Comfylodge*
2. *EcoSphere*

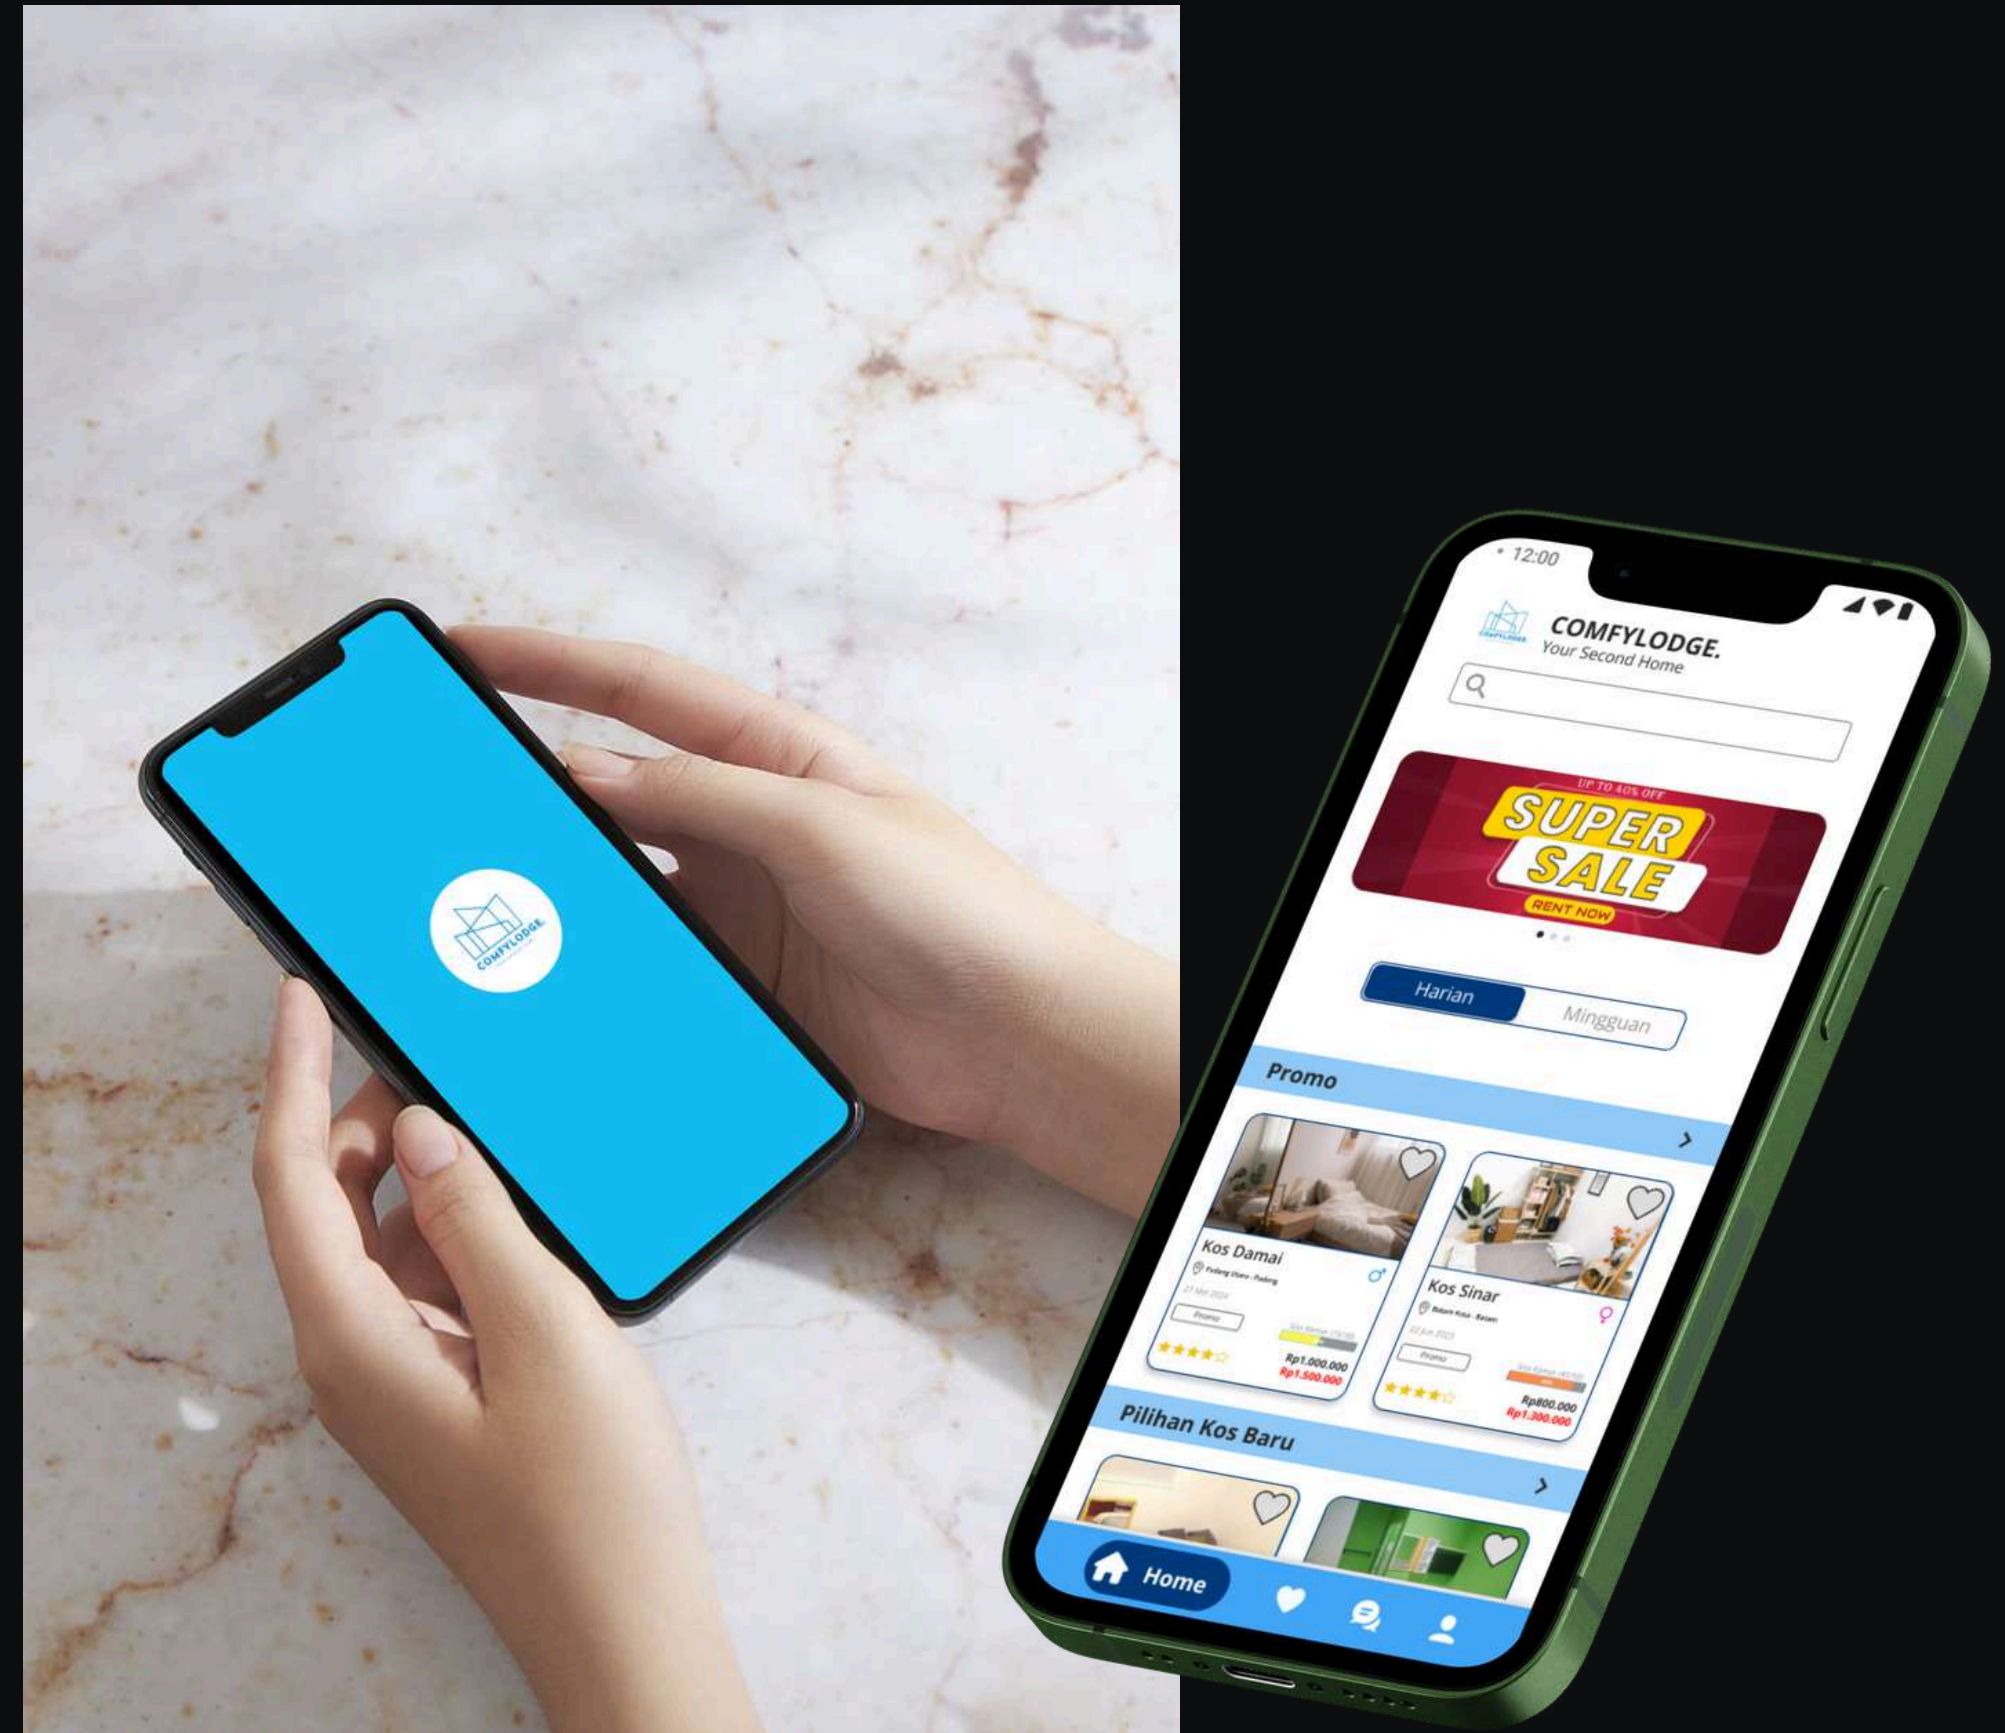

ALIFNOV\_

# COMFYLODGE

This boarding house service app helps users, especially new university students, find accommodations easily online. Users can view details such as facilities, prices, and locations without visiting in person. The app also provides information about the distance to nearby public facilities, helping users choose a place that best fits their needs.

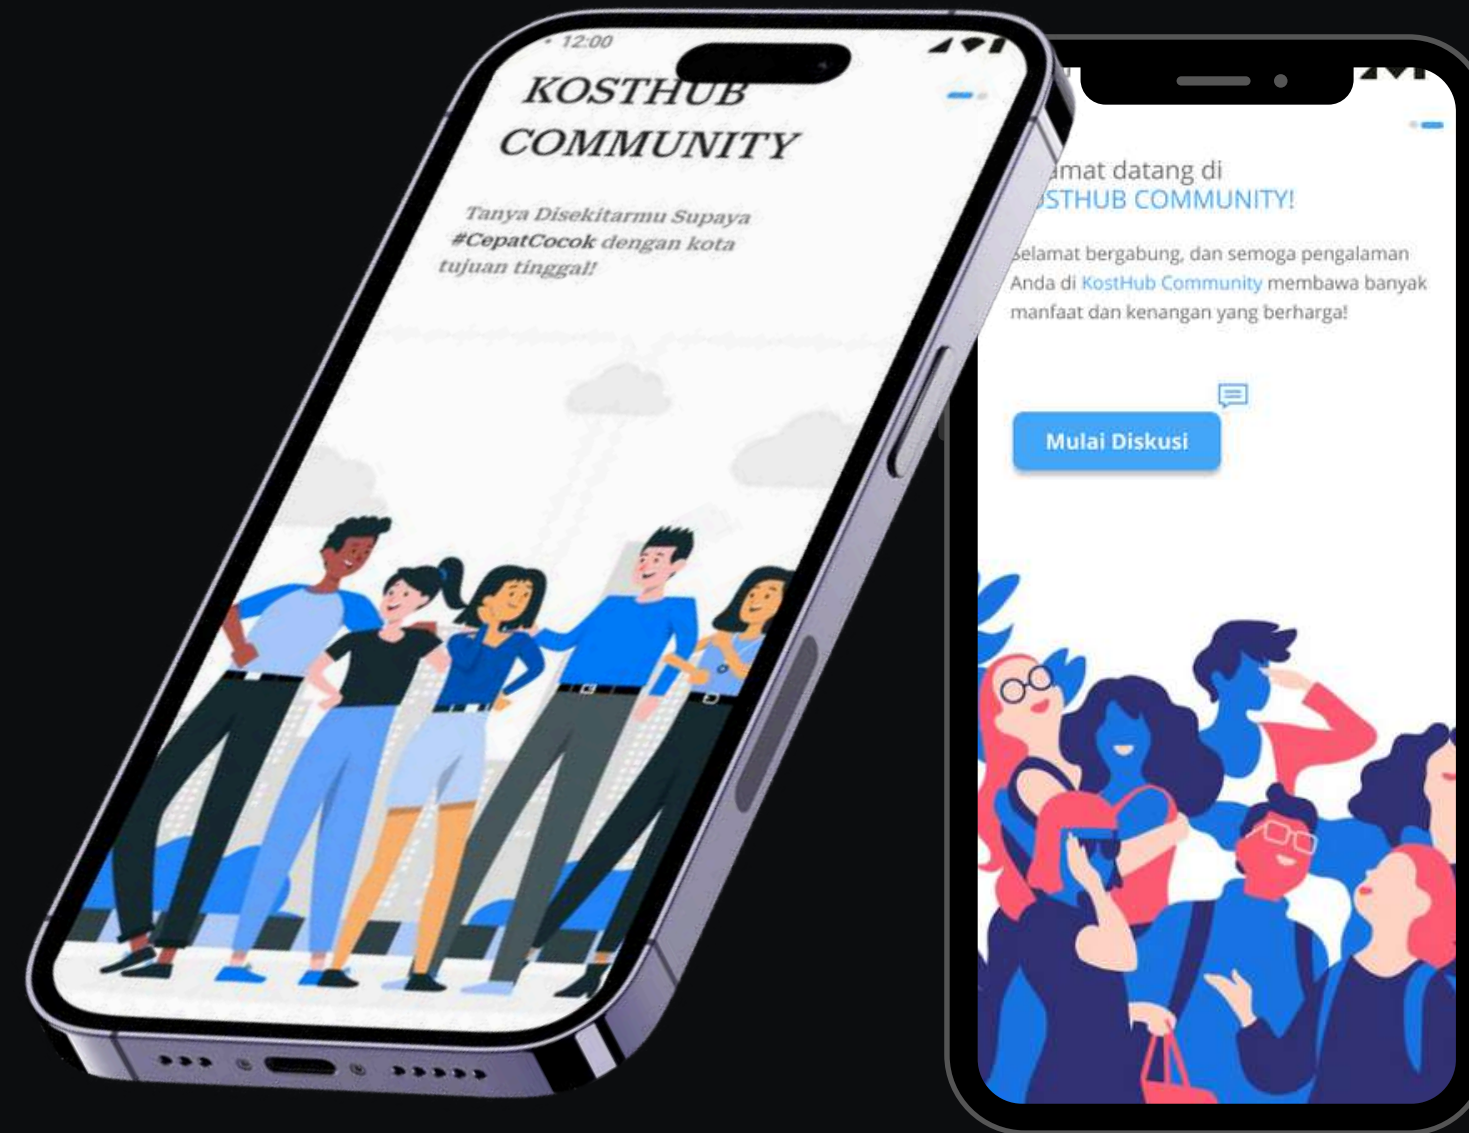

ALIFNOV\_

# HIFI MOCKUP

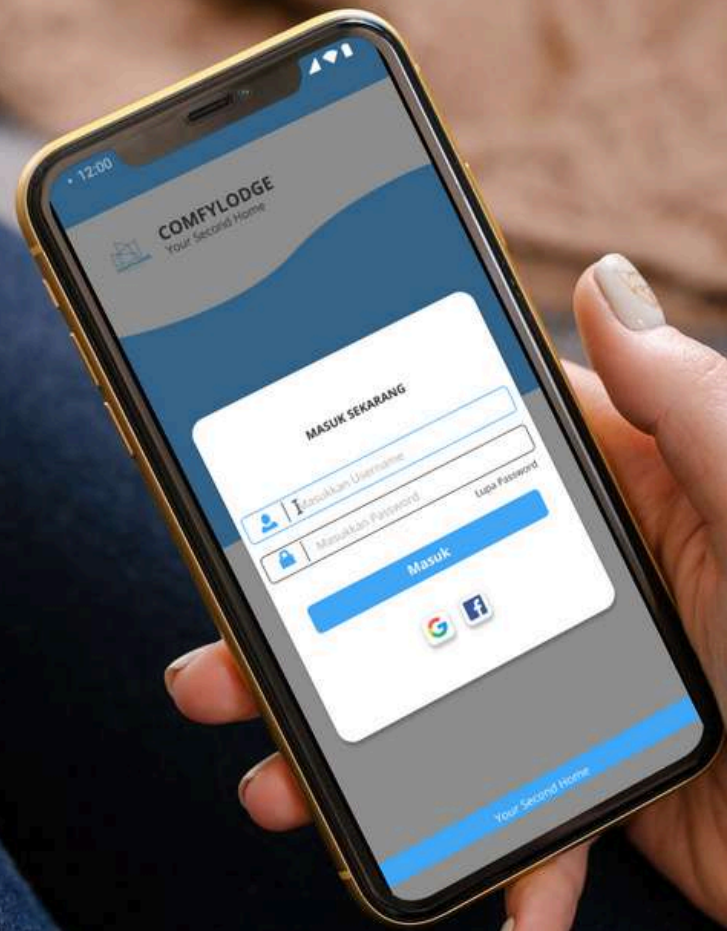

Sebelum pada tahap Hi-Fi terdapat pembuatan Low-Fi pada design aplikasi. Pada Hi-fi ini kita mulai membuat rancangan aplikasi yang lebih lengkap dan menerapkan design sistem yang telah di buat agar design lebih rapi dan tertata.

# ECOSPHERE

Ecosphere is an educational and informational app about waste management, designed to increase user awareness and interest in handling waste properly. The app offers several engaging features, including:

- **Engaging Content:** Learn about waste and its impact through fun, easy-to-understand educational materials.
- **Waste Classification:** Discover detailed information about different types of waste and how to manage them properly.
- **Discussion Forum:** Join a community of environmentally conscious users to share tips, ideas, and insights on waste management.

# HIFI MOCKUP

Before reaching the high-fidelity (Hi-Fi) stage, a low-fidelity (Lo-Fi) prototype was created to outline the basic structure of the app. In the Hi-Fi stage, a more complete and detailed design was developed, applying the established design system to ensure a clean and organized interface.
